

Home Learning at Bolney CEP

Strong links between home and school are so important and we are very lucky to have such supportive families here at Bolney CEP who this term have gone above and beyond to help our pupils to produce some amazing homework.

This term each class was given a home learning grid which comprised of 12-16 activities linked to: speaking, listening and writing; maths, science and problem solving; constructing and creating and active body and mind. Over the course of the term, the children were challenged to complete as many of those activities as they could, in any order. The results were incredible and there has been a steady stream of models, edibles, written pieces and art work arriving in school throughout the term. Classes have shared and celebrated and there is a display in the library too.

The children are so proud of their achievements and had this to say:

“I like doing homework like this because you can do it your own way. My mum and I searched on Google and found a recipe for what Mayans would have eaten.” Dot Yr4

“My mum and dad enjoy helping me. I made fudge covered in chocolate which was made out of coco beans like the Mayans used.” Sophie Yr3

“I loved the DT tasks. My dad got the cardboard for my Viking Longship, mum drew the dragon head and my sister and I made the shield.” Amber Yr 5

“I enjoyed the cooking and the art homework. At one point the whole house was covered in paper because I tried to do my dragon’s head 1000s of times!” Lyssa Yr 6

"I loved making my pizza!" Ben Yr R

The pupils say that they are all looking forward to the home learning grids which will be linked to the new big questions for their Summer Term projects.

We are always keen to link with experts in the community, so if you want to get involved, do ring us on 01444 881352 or email office@bolneyprimary.school
